

Abdominal and Pelvis CT Scans

Nothing to eat or drink 4 hours before scan time, except for the gastrograffin contrast.

(Allergy Warning: Gastrograffin is an x-ray “dye” which is iodine based)

Adults (including children 12 years and older)

30ml bottle

Step 1: Take 10mls of gastrograffin in 250 mls (1 cup) of liquid at bedtime before the scan

Step 2: Take 10mls of gastrograffin in 250 mls (1cup) of liquid 1.5 hours before the scan time

Step 3: Remaining gastrograffin is to be brought to your appointment

Dilution of the gastrograffin with a liquid is very important! Mix each gastrograffin dose with 250 mls (1 cup) of water or clear juice.
